## Education

---

Aug 2019 - Dec 2022 • **BA in Mathematics & Computer Science** • Cornell University

GPA: 4.041/4.3. Cum laude in math. Classes in functional programming, programming language theory, compilers, formal verification, logic, machine learning, and linguistics.

## Research

---

May 2023 - Present • **Hazel Polymorphism Research** • Future of Programming Lab, UMich

*With Adam Chen, Cyrus Omar*

Worked on developing and mechanizing the theory of explicit polymorphism in Hazel. Used the Agda proof assistant. [Hazel](#) ↗

Jun 2022 - Sept 2022 • **PDG Divergence Research** • Cornell University

*With Oliver Richardson, Joseph Halpern*

Explored alternative definitions of Probabilistic Dependency Graph inconsistency using different statistical divergences. [PDG's](#) ↗

Jan 2022 - May 2022 • **AI POWER-Seeking Research** • AI Safety Camp

*With Tomasz Korbak, Samuel King, Ben Laurence, Alex Turner*

Worked to generalize the original POWER-Seeking Theorem to partially observable environments, modeled as Partially Observable Markov Decision Processes.

Nov 2021 - Oct 2022 • **Causal Intention Research** • Cornell University

*With Meir Friedenberg, Joseph Halpern*

Examined the relationship between the Cohen & Levesque and Halpern & Kleiman-Weiner definitions of Intention by defining them both in a unified formal model.

Jun 2021 - Aug 2021 • **Information Extraction Research** • CSURP Program, Cornell University

*With Aliva Das, Barry Wang, Claire Cardie*

Wrote code to automate analysis of frequency of different error types for document-level template filling models. See corresponding publication.

Oct 2019 - Mar 2020 • **Word Vector Geometry Research** • C.Psyd, Cornell University

*With Marten van Schijndel*

Worked on analyzing the geometry of syntactic classes in word vector embeddings.

## Publication

---

**Automatic Error Analysis for Document-level Information Extraction from Scientific Text**

Aliva Das, Xinya Du, Barry Wang, Kejian Shi, Jiayuan Gu, [Thomas Porter](#), Claire Cardie

[ACL 2022](#) ↗

## Teaching

---

Fall 2020, Spring 2021 • **TA for CS 2800: Discrete Structures** • Cornell University

Fall 2021 • **TA for CS 3410: Computer Systems** • Cornell University

Fall 2022 • **TA for CS 3110: Functional Programming** • Cornell University

## Conferences

---

Attended : **ICFP/PLMW 2023** [!\[\]\(529949c2c3dadbaa4e538e8c643454bc\_img.jpg\)](#) • *Seattle, WA*

Attended : **MWPLS 2023** [!\[\]\(3dfb8d66e81160ad61421a3452093d1b\_img.jpg\)](#) • *Ann Arbor, MI*

## Programs

---

2021 Computer Science Undergraduate Research Program (CSURP) [!\[\]\(0f848bbd71cef6b345273b16f905912a\_img.jpg\)](#) • *Cornell University*

2022 Summer School in Logic and Formal Epistemology • *Carnegie Mellon University*

## Talks

---

A Rapid Introduction to Type Theory • *Splash! at Cornell, Fall 2022*

## Industry Experience

---

Jun 2020 - Aug 2020, Jan 2021 • **Machine Learning Intern** • DTech, LLC

Researched and implemented machine learning algorithms for cybersecurity anomaly detection. Used Scala, Apache Spark, and TensorFlow.
